March Monthly Report

Bangkok Bureau

A. Non-Expendable Property Received:

Dehydrator, Automatic Pressurization, f/u/w antenna cables, Cable-wave Systems model APD-132, Serial no. 11803, one each.

B. Items of Engineering Interest:

1. The project for relocating the antenna cables above ground was started at the Bang Ping receiver site during the month. After the locations were marked by Assistant Bureau Engineer [] the contractor began installing the concrete supporting poles and guy anchors. At month's end nearly all poles had been installed.

2. The same contractor that is installing the antenna cable support poles was also hired to install a shower in the restroom at the Bang Ping receiver site. The shower provides the bureau employees at the receiver site a place to clean up after working in the antenna field and when staying overnight due to tight scheduling or non-availability of transportation.

3. After replacement of defective EPROMs, all five of the bureau's Extel ASR machines are working properly with the new EPROM kits. The new EPROM kits were installed to correct the problem of an additional carriage return being generated in the memory when data is entered into the memory from the tape reader.

4. An entrance door-open warning light system was installed when it was discovered that cleaning and building maintenance people were deliberately leaving the bureau entrance door slightly ajar, so that it was not latched, in order to gain entrance easily and frequently without bothering the editor or receptionist. The system consists of two red warning lights at the receptionist and editor desks that are operated by a switch on the door. When the door is blocked open or otherwise not fully closed, the warning lights alert the editor or receptionist to the insecure condition.
